

**Sec. 2.10: Modify BRIXX Procedure into San Jose International Airport**

Maintain existing preamble with one change: replace “~~residents in affected~~ residents” with “residents in affected communities” at the end of second paragraph.

Then, INSERT the following as a Recommendation:

**The Select Committee recommends that, following implementation of changes to the current Southern arrival route, the FAA shall develop a new BRIXX procedure that maintains the highest possible altitude at the point where it (BRIXX) intersects the new Southern arrival route.**

**The FAA should make every attempt to raise the altitude high enough such that the DNL under the new intersection (where BRIXX and new Southern arrival cross) is lower than the DNL under the current intersection (where BRIXX and the current SERFR route cross).**

**The FAA shall review any proposed new BRIXX procedure with the new Committee(s) created by the recommendations in Section 3.1 and the affected communities.**
